## FAG 806078 deep groove ball bearings

We work closely with our FAG 806078 deep groove ball bearings manufacturing 42 mm d partners to bring the best value 57 mm D to customers.

| d                            | 42 mm                            |
|------------------------------|----------------------------------|
| dynamic load capacity:       | 6400 lbf                         |
| D                            | 57 mm                            |
| static load capacity:        | 12600 lbf                        |
| В                            | 20 mm                            |
| maximum rpm:                 | 10000 RPM                        |
| needle bearing type:         | Machined Bearing with Inner Ring |
| flanges:                     | With Flanges                     |
| closure type:                | 0pen                             |
| series:                      | NKI                              |
| operating temperature range: | -20 to +120 °C                   |
| lubrication hole type:       | Lubrication Groove & Hole        |
| cage material:               | Steel                            |
| precision rating:            | Not Rated                        |
