

ISO GE220UK-2RS plain bearings

What is ISO GE220UK-2RS plain bearings in mechanical engineering? 0.8750 in d Manufacturing Service . Upload Requires Lubrication lubrication type: your CAD file for an instant.

d	0.8750 in
lubrication type:	Requires Lubrication
D	1.5625 in
closure type:	Open
misalignment angle:	7 °
outer ring material:	4130 or 4340 Alloy Steel
inner ring width:	.8750 in
inner ring material:	Aluminum Bronze
bearing type:	Radial
outer ring width:	.7030 in
