

# where to buy skf bearing

SKF is the world's largest ball bearing manufacturer, and its products are used in many industries. The company makes bearings for the automotive industry, construction equipment, turbines, industrial machinery, mining equipment and more.

SKF is based in Sweden and has more than 1 million customers worldwide. The company sells products under the SKF brand name as well as other brands such as FAG and INA. SKF also has several subsidiaries around the world including Skf America Corporation (USA), SKF France S.A., SKF Deutschland GmbH (Germany), SKF India Private Limited (India), Skf Schweiz AG (Switzerland) and SKF China Ltd.

## SKF bearing distributors in Denmark.

SKF is a leading global supplier of bearings, seals and mechatronics to the world's most successful companies. We are a Swedish family-owned business working with industrial partners in more than 130 countries.

SKF has been active in the Danish market since 1954, when the first sales office was established in Copenhagen. Since then, SKF has established subsidiaries in other Nordic countries as well as Germany and the United Kingdom.

As a global leader in bearings, seals and mechatronics within industry and energy, SKF can offer comprehensive solutions for all industries through its comprehensive range of products and services.

## SKF bearing distributors in Canada.

SKF Canada is a leading global supplier of bearings,

industrial gears, mechatronics, lubrication systems and services for the commercial vehicle, rail and aerospace industries. SKF's operations in Canada include two manufacturing facilities in Toronto and Calgary, and a distribution centre in Mississauga. SKF Canada has over 80 years' experience delivering solutions across a wide range of sectors to customers across North America.

SKF Canada is a leading manufacturer of bearings, power transmission products and services for the industrial, automotive, aerospace and rail markets. SKF products are distributed globally through a network of more than 160 distributors.

SKF has been in the Canadian market since 1851 when the company established its first branch in Montreal. In addition to Canada's bilingual workforce and proximity to the United States, SKF chose Canada as its base for expansion into North America because of its strong manufacturing capabilities and extensive distribution network.

The SKF bearing distributors in Canada are mainly found in Toronto, Calgary, Edmonton, Montreal and Vancouver. They provide various types of bearings such as roller bearings, ball bearings and needle roller bearings.

## **SKF bearing distributors in UK.**

SKF is a leading global supplier of bearings, seals, mechatronics, lubrication systems, and services which include technical support and maintenance. The company has over 90 years of experience in the bearing industry and its products are used in almost every industrial sector. SKF UK is part of the Bearing Division of SKF Industries.

SKF UK offers a wide range of bearings to suit any application – from simple bearings to complex mechatronic systems. The product range includes bearings for aerospace, energy,

industrial equipment and heavy-duty applications such as wind turbines and large earthmoving equipment.

SKF UK also offers a wide range of seals and gaskets for virtually any application including those requiring tight tolerances or special materials such as carbon steel or stainless steel.

## **SKF bearing distributors in Japan.**

SKF Japan is a leading manufacturer of bearings, seals and accessories for markets in Asia, America, Europe and Africa.

SKF Japan has been operating in Japan since 1952. Today with offices in Tokyo and Nagoya, the distribution network covers Japan from north to south. The Japanese subsidiary of SKF was established in June 1998 as a 100% owned subsidiary of SKF AB with its headquarters in Tokyo.

SKF Japan's sales and service staff are experienced engineers with extensive knowledge of all aspects of bearing technology. They work closely with their clients to provide solutions that meet each client's specific needs.

In addition to manufacturing high-quality bearings for motor vehicles (cars, trucks), SKF Japan also manufactures bearings for mining equipment (rolling mills), construction machinery (excavators), agricultural machinery (tractors), and other industrial equipment such as pumps and compressors machine.

## **SKF bearing distributors in USA.**

SKF USA Inc. is the North American subsidiary of SKF AB, a leading global supplier of bearings and related products. Headquartered in the Chicago area, SKF USA has more than 1,500 employees and operates manufacturing plants in Chicago; Memphis, TN; Houston, TX; and Dallas, TX. More than 50 percent of SKF USA's sales are generated from industrial customers in

industries such as mining equipment, construction machinery, wind energy and rail transport. The rest comes from commercial aerospace and defense customers such as Boeing Commercial Airplanes and United Launch Alliance as well as retail automotive customers such as General Motors and Ford Motor Company.

SKF USA has been supplying bearings for the U.S. market since 1872 when it opened its first U.S.-based plant in Akron, OH to serve customers in the steel industry. Today SKF USA operates three manufacturing plants: two in Chicago (one serving industrial customers across North America) and one in Houston (serving aerospace & defense customers across North America).

## **SKF bearing distributors in Spain.**

SKF Spain is a leading manufacturer of bearings, seals and mechatronics products. In addition to the world's most comprehensive range of bearings, it also supply our customers with a broad product portfolio, including seals and mechatronics products.

SKF has been present in Spain since 1914 when the first local agent was established in Barcelona. Today there are 24 sales offices across the country, as well as a large distribution network that includes more than 250 distributors, who provide SKF products to all areas of industry.

The SKF Group has been operating in Spain for over 75 years and currently employs around 1 000 people across the country. The company has three manufacturing plants in Spain – two factories producing mechanical components at Barcelona and one plant producing rotors at A Coruña – which together employ about 1 000 people.

SKF Spain is headquartered in Madrid with regional offices located in Barcelona (North), Valencia (East), Sevilla (South) and Bilbao (Northwest).

SKF has employees in a large number of countries, in addition to sales and service offices around the world. In total, the company has some 17,000 employees. Globally, it has more than 30 manufacturing operations, 15 large product development centres, 13 research and development centres and employs some 32,000 engineers.
